Top award for Greymouth h

A GREYMOUTH home has been recognised as the best house on the West Coast after it took out the supreme award in the West Coast Registered Master Builders (RMB) PlaceMakers 2011 House of the Year and RMB Commercial Project Awards.

The house, built by Tony Wilkins Builder Limited, impressed the competition judges with its high quality workmanship.

"This is a great build with a very good finish. The home's layout works well for the family,

with bedrooms and master bedroom at opposite ends for privacy, and a central living area for coming together," judges said.

The judges were also impressed by the positioning of the house to take advantage of the morning sun.

"This home has been strategically placed high on the hill overlooking land and sea with well placed verandas over several parts of the home, providing protection from the

wind and sun. The home will be proud of its achievement. There were 10 winners from the region, and the house will be assessed for a gold award in other regions of the country, with the award announced in the overall national categories by a national judge at a gala dinner in November.
